Lancaster Farming

VOL. 10 NO. 46 | Lancaster Farming, Saturday, October 16, 1965 | $2 Per Year

Committee On Agriculture Is Named By Gov.

HARRISBURG — A 16-member Committee on Agriculture, named just recently by Governor William W. Scranton, will have its first meeting Monday, October 25.

Appointment of the committee was an outgrowth of the Governor's Conference on Agriculture in Harrisburg last April 7

At that conference speakers representing agriculture, agribusiness, industry, education and government cited potentials for further development of Pennsylvania's farm program and of the whole agribusiness field.

Conference delegates requested the appointment of a committee to work with Agriculture Secretary Leland H. Bull and his department. Its purpose would be to examine this potential for growth and to devise an appropriate plan of action.

Secretary Bull will preside at the first committee session, starting at 11 a.m., in room 103 of the Agriculture Building, 2301 North Cameron Street. Governor Scranton will address the committee briefly on the task assigned to it.

TGE Vaccine Is Approved

A license to produce a vaccine for use against transmissible gastroenteritis (TGE), a serious disease of baby pigs, has been issued for one year, the U. S. Department of Agriculture reported this week.

Renewal of the license will depend on results of field use of the vaccine and further experiments under controlled conditions The license was issued to Diamond Laboratories, Inc. Des Moines, Iowa, by the Veterinary Biologics Division of USDA's Agricultural Research Service

Division officials point out that TGE vaccine does not provide the degree of protection usually expected of immunizing agents, but it will help farmers reduce losses from this highly fatal disease. Studies indicate that the vaccine is about 60 percent effective in its protective ability.

The vaccine is made with killed virus and administered to sows in 2 doses 30 days apart, the second dose at least 30 days before farrow-

A NEAR-PERFECT SCORE by Hess Bros., Inc., Ephrata, earned them the NEPPCO Egg Show title. Shown at right above, Paul Hess accepts an armload of awards topped by the "Best of Show Gold Award" from J. Clifton Lambert, Jr., of the N. J. Department of Agriculture for his entries of market eggs in the country's largest egg competition at the 28th annual NEPPCO Exposition at Harrisburg.

Annual Livestock Tour Planned For October 21

The annual Lancaster County Livestock Tour has been set for Thursday, October 21, according to M M Smith, Lancaster County agricultural agent It will consist of a one-day bus tour into Bucks, Montgomery, and Chester Counties

The tour will visit the Hatfield Packing Plant at Hatfield, which slaughters and processes 1600 hogs per week, and the Abram F. Moyer

Flock Size Most Important Single Factor For Egg Profits, Poll Shows

HARRISBURG Pa — The size of his flock is probably the single most important factor in earning a livelihood for the poultryman who does not market his own eggs

John W Carncross professor emeritus of the Department of Agricultural Economics at Rutgers University, made that observation this week in a speech at the 28th Northeastern Poultry Producers Council exposition and convention held in the Farm Show Building here

Reporting on a three-state survey which he recently completed especially for NEPPCO, Carncross told poultrymen that "there are many factors that contribute to a successful and profitable poultry business . yet even if a producer is 'good' in all of the many factors, but has a size of business not competitive with today's trends, his net return will not be satisfactory"

Using a series of charts based on his study, the professor showed that today's trend is toward larger and more integrated poultry operations because they provide the most satisfactory return.

Carncross reported his study showed that small farms in New Jersey, with an average of 5,100 birds, produced an annual labor income of minus $2,093; medi-

14-State, Industry-Wide NEPPCO Show Concludes Successful Annual Stand

HARRISBURG, Pa — The 28th exhibition of the Northeastern Poultry Producers Council, with the theme "Heralding a New Era in the Northeast," featured industry exhibits, educational programs, the annual banquet and poultry princess pageant during its three-day-stand at the Farm Show Building this week.

PENNSYLVANIA MISS NAMED POULTRY PRINCESS

An overflow crowd of poultry industry folk filled the ballroom at the Holiday Inn Town on Wednesday evening for NEPPCO's annual banquet and poultry princess pageant. Topping a field of 17 beauties from the 14-state area served by NEPPCO was Connie Hoffman, a 20-year-old brunette from Catawissa, Pa Miss Hoffman was sponsored in the contest by Whitmoyer Laboratories, Inc., Myerstown The two runnerup spots went to West Virginia and New Jersey girls.

HESS BROS., INC. TAKE EGG SHOW

A near-perfect score enabled Hess Bros., Inc., of Ephrata to win the nation's largest market egg show at the

Entries For Pa. Livestock Exp. Near '64 Record

State Agriculture Secretary Leland H. Bull has announced 3,286 entries have been received for the ninth Pennsylvania Livestock Exposition scheduled for November 8 to 13 in the State Farm Show Building.

This total, he said, is "well above average" for these shows, and within a few head of the all-time high set a year ago. "This encouraging response from breeders in Pennsylvania and many other states," Secretary Bull stated, "assures a successful show. It is an evidence, too, that the exposition is serving its purpose as a spur to the further development and improvement of the livestock industry"

Harold R McCulloch, exposition manager, said beef cattle will total 611 head, sheep, 1,222, swine, 1,239, and horses, 214

Beef cattle will include 308 head of breeding stock, plus eight breeding cattle in a jun-

Grazing On Diverted Acres Okayed By Lanc. County ASCS Office

Fred G Seldomridge, chairman of the Lancaster County Agricultural Stabilization and Conservation Committee announced this week that any of the 762 farmers in the county participating in the 1965 feed grain and wheat certificate program may now graze their diverted acreage without losing program benefits. The starting date for such grazing was October 1, Seldomridge said.

This program relaxation, however, applies only to grazing privileges; hay on such diverted acres may not be harvested. Land diverted under the Conservation Reserve Program may not be grazed or harvested through the whole year

The ASCS office also announced there would be no Fall signup for the 1966

SNF Records Reported For 2 Area Herds

Dairy cows from two registered Holstein herds in the area have been listed in an official production testing report from the Holstein-Friesian Association of America. Their performance records include solids-not-fat (SNF) information

Three cows tested in the Red Rose Research Center

(Continued on Page 4)

Weather Forecast

Temperatures for the five-day period, Saturday through Wednesday, are expected to average above the normal high-low range of 66 and 44 degrees. It will be warm during most of the period, but cooler toward the end.

Precipitation may total ¼-inch, occurring as showers about mid-period.

Weekly Poultry Report

Eastern Pennsylvania And New Jersey

WEEKLY SUMMARY

LIVE HENS

Prices on light type hens unchanged. Demand good. Offerings adequate in N.J., but ample in Pa. Active movement noted from New York State to New Jersey processors. In occasional instances of prices over 8c, some flocks being regarded & separated for additional egg production. Trading on heavy type hens light with moderate supplemental supplies being brought in from New England sections. Prices paid at farms: light type hens 7-8½ mostly 8c; heavy type hens 15c.

TURKEYS

Demand light. Offerings ample. Most movement consists of intra-company flocks or prior committed transactions. Occasional lots of heavy type hens sold at 23½-24c; heavy type toms too few to report.

Fogelsville

October 12, 1965

(Prices for dock weights, c per lb. except where noted.)

Hens, Light Type, range 7½-9½, mostly 7½-8½; Hens, Heavy Type 8-17, 13-16; Pullets 14-34, 27-31; Roasters 11½-37½, 27-33; Capons 29-33½, 32½-33½; Ducks 20-36, 29-33, Drakes 17-38, 31-38; Turkeys, Hens 29½-31; Rabbits 13-34, 29-34; Guineas 50-57, 55-57, Pigeons (per pair) 55-95, 70-80; Jumbo Squab 70. Total Coops Sold: 1,103.

Eastern Shore Exchange

WEEKLY SUMMARY

Broilers and fryers live prices on the Eastern Shore Exchange averaged 16 04 cents per lb. this week, up ½-cent from last week's average

Prices paid ranged from a low of 15 2 cents on Monday to a high of 16 9 cents on Thursday

Sales for the week of 1,054,500 head were off about 100,000 head from last week's total sales.

Delmarva

October 15, 1965

Delmarva broiler and fryer prices declined nearly ¼-cent. Demand only fair for light auction offerings. Live supplies adequate though ranging slightly heavier than desired in instances.

Ready-to-cook demand ranged slow to fair, but lacked aggressiveness as dealers resisted higher price levels.

Estimated slaughter for Friday and Saturday, 837,000 head, compared to 908,000 head last weekend.

In the 24 hours preceding market close on Friday, broiler prices ranged from 15.5-16.9 cents per lb. on sales of 793,800 head.

From Where We Stand . . .

Rent Your Farm To The Government?

The Cropland Adjustment Program (CAP) of the new "ominous" farm bill promises to put the federal government ever deeper into the land business. In fact, farmers seeking to enlarge their operations in the future by buying additional land may run smack into inflated land values at best, and no land available at worst, because of government competition in the land market.

The idea of this program is to divert land from surplus production and alter its use to hunting, fishing, etc. If CAP were to concentrate its activity on marginal, low-productivity land, it would probably be a worthwhile and successful program But it is not our understanding that such is the intention. The intention seems to be to "rent" cropland by paying up to 40 percent of the market value of the retired crop, and the only restriction seems to be that the crop must be one which is under price supports.

The CAP goal is to remove about 40 million acres of land from crop production — eight million each year for the next five years! This program may not mean too much in Lancaster County where we already have our own problems with inflated land values, but it is bound to push land prices up over the country as a whole, thus working a further hardship on the farmer who wants to expand and remain in farming, or the youngster who wants to get into farming as an occupation.

What Do **YOU** Think?

★ ★ ★ ★

"A Duty To Fight"

So said Senator Everett Dirksen as he rallied filibuster forces in the U S. Senate against repeal of Section 14(b) of the Taft-Hartley law The House-passed bill for repeal has hopefully received a permanent squashing by the Dirksen coalition.

Repeal of the so-called "Right To Work" section of the Taft-Hartley law was a campaign promise made by President Johnson to the powerful labor union leaders. In effect it says that joining a labor union is compulsory for all workers and that no state has the right to pass any law to the contrary — although nineteen states have already enacted laws which leave the choice of joining or not joining a union in the hands of individual workers where it belongs

In a slick maneuver last week, Senate Majority Leader Mike Mansfield decided to find out how many senators would vote with him for cloture to choke off a Dirksen filibuster Mansfield moved to table a motion that the bill be brought up for debate, and invited all senators who would vote for repeal to vote against the tabling motion — which if passed would kill repeal chances for this session. Dirksen decided to deny Mansfield the information the latter sought, and ordered his forces to also vote against tabling. The vote was 96 to 0.

Mansfield's next move on Monday was to call for a cloture vote. This would require a two-thirds majority of those senators voting and would limit the debate to one hour per senator. Mansfield wasn't even able to get a simple majority for cloture — the score was 47-45 against. So the filibuster continued. On Tuesday, Administration forces surrendered the fight for repeal for this session

As Senator Dirksen said, "the whole question of freedom" is at stake here, and there is a duty to fight and to educate the country on what is involved.

Freedom is indeed involved, and Dirksen's success signals the first major congressional defeat for the "anti-freedom" forces of the Great Society. Time is long overdue for Congress to stand firm and say "NO" to the stampeding methods and endless demands of Lyndon Johnson!

What Do **YOU** Think?

★ ★ ★ ★

The Unfinished Job

As a stranger looks at Lancaster County, especially from the air, he is likely to get the impression that the county is one beautiful garden with every inch of land practicing proper conservation procedures.

But such is not the case — even in Lancaster County the conservation job is only about one-third finished Considering our tremendous number of farms, that one-third represents a lot of conservation, but the remaining two-thirds of county land "unconserved" represents an even greater amount.

According to Soil Conservation Service Administrator Don Williams, the "soil and water conservation job has been adequately accomplished on about a third of the privately owned lands in the country . . . substantial progress has been made on another third", but the remaining third is the victim of unrestrained erosion, sedimentation, and water management problems. This neglected area includes rural America, sprawling suburbia, and land along public thorofares.

The unfinished and the unstarted thirds of the conservation job should be of real concern to every American When you are surrounded by examples of good conservation practices it is very easy to feel complacent about conservation But it is not a job that will ever really be finished; it is one which we will have to keep after constantly, and even then we'll be running way behind schedule.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Craftsman

Lesson for October 17, 1965

Background Scripture: Exodus 31 1-5, 35 30 through 36 7, 37 through 38
Devotional Readings: 1 Timothy 4 6-16.

If you were about to meet a man you did not know, (all you knew about him being that his name was Bezalel) and your introducer told you, "This man has been called by God," what sort of man would you expect to see?

Dr. Foreman

You'd be surprised. This man is evidently no Priest nor preacher. He is an artist. From cover to cover, he is about the only artist mentioned in the Bible. He belongs to a class of people you don't expect to find in church. This particular artist had perhaps had training in Egypt where at that time (as we know from King Tutankhamen's tomb and otherwise) there flourished skilled jewelers, engravers, weavers, embroiderers, carvers of wood and of metal, whose skill has never been surpassed. At any rate this Bezalel (pronounced BEZzalell) was an artist in all these ways. He was the creative artist and craftsman in charge of the construction of the Tabernacle, a small but exquisitely beautiful shrine, center of the worship of Israel, the Tent of God Himself, as they believed.

Beauty and religion

It was only later that the Hebrew people got it into their heads at last that God is everywhere. But it was important with them to know that God is somewhere — and for a child, or a child-people, that means you can point to him. So if you could have flown back there three thousand years or so, on a time-machine, and if you had asked almost anyone, Where is your God? they would all have pointed to this beautiful tent-shrine and said: There is where God lives! Right in among us, at the center of where we live. But since God is Who He is, He does not live in an ordinary tent like the tents of men. His dwelling must be incomparably beautiful and costly.

Qualifications of artists

This Bezalel was no picked-up journeyman jack-of-all trades. When God called him he was already a master craftsman. Look at the list of his qualifications: "ability, intelligence, knowledge, craftsmanship," versatility too. He is not a man of one craft alone. Every one of his qualifications was needed for his various masterpieces. To this day no man can be a true artist without ability first of all. No amount of inspiration and ambition can make up for clumsiness. Intelligence too; how much modern art expresses intelligence rather than confusion? Knowledge also; it may be true that the great artist "swallows all formulas" but whether it be music or poetry or architecture or drama, there is a hard apprenticeship for every true artist. Much art today is not true art because it is clear that this "artist" has never really studied the principles of his craft.

Inspired to teach

Of course this Bezalel did not build and adorn the Tent of God alone. Oholiab and others helped him, un-named men who were the great artists pupils. We read that Bezalel was inspired to teach. The three great things an artist can do, this Bezalel did: Create (dream and design), produce, and teach. In the marvelously beautiful collection of glass flowers at Harvard, the visitor is saddened by being told that the artist who made these lovely things did not pass on his knowledge and skills to others. No more such miracles in glass were made after his death. Perhaps he did not teach because teaching is even more difficult than doing it yourself. Creating beauty is hard to teach, partly because one man seldom shares another's inspiration, partly because, unlike science, art has few rules. Blessed be the artists who like Bezalel can teach others what it is not only to feel but to create what is beautiful!

ATTEND THE CHURCH OF YOUR CHOICE SUNDAY

Now Is The Time . . .

MAX SMITH

To Plant Ground Cover

Land that is allowed to remain without any vegetative cover over the winter months is open for both wind and water erosion Cover crops such as ryegrass, winter wheat, or rye may still be seeded and give growth before the ground freezes These green manure crops may be plowed down next spring and add to soil fertility

To Store Fuel Properly

Poor practices in the storing and handling of gasoline and kerosene are the prime causes of farm fires. The safest place to store gasoline is in an underground tank; if either gasoline or kerosene are to be stored above ground, the leak-free tanks should be at least 40 feet from any building. Small amounts can be stored in safety cans but keep them well labelled. When handling these fuels keep away from flame or heat and do all refueling outside.

To Prepare for Power Loss

In this day of power-equipped farming, an interruption or loss of electricity is very inconvenient and could be quite expensive. The lack of power will stop chick and pig brooders, automatic furnaces, water systems, milking machines and coolers, and many other pieces of needed machinery. During these interruptions a small engine driven generator will help to complete many critical jobs. See your local power company representative for standby generator details.

To Take Correspondence Courses

Penn State University continues to offer many correspondence courses throughout the year; these practical lessons by mail have been helpful to many people throughout the country. For an investment of only a few dollars modern suggestions relating to all kinds of agriculture and landscaping may be obtained For additional details write, Correspondence Courses, Box 5000, University Park, Penna.

herd owned by John W Eshelman & Sons, Lancaster, were

Hope Leader Jewel, a four-year-old registered Holstein, has credits of 20,163 lbs milk, 879 lbs butterfat and 1,784 lbs solids-not-fat in 340 days Red Rose Sovereign Peonaveld, a 10-year-old, has produced 20,379 lbs milk, 836 lbs butterfat and 1,714 lbs. solids-not-fat in 353 days, Honey Due Korndyke Linda, a six-year-old, had 17,138 lbs. milk, 626 lbs butterfat, and 1,472 lbs. solids-not-fat in 305 days

Two cows reported in the Robert H. Kauffman herd, Elizabethtown R1 were:

Penn Springs Regal Daisy Mae, a seven-year-old registered Holstein, has credits of 17,616 lbs. milk, 809 lbs butterfat and 1,509 lbs. solids-not-fat in 341 days; Penn Springs Lad Bubbles, a five-year-old, has produced 16,122 lbs milk, 609 lbs butterfat and 1,372 lbs. solids-not-fat in 320 days.

● TGE Vaccine

(Continued from Page 1)

ing Prevention of TGE in the baby pigs depends on the production of antibodies, which the sow passes on to her newborn pigs through her milk during the first 4 or 5 days — the period when death losses are highest. Neither the pigs nor the sows are permanently immunized.

Although the cause of TGE has not been fully established, scientists have isolated a number of related viruses and other organisms thought to be associated with the disease. There is no known treatment.

Symptoms of TGE in baby pigs include vomiting, diarrhea, dehydration, and lack of appetite. Infected sows may stop milk production, and pigs that survive are frequently stunted and poor feeders. The disease is seasonal and usually occurs only in the winter months. Although sows and other older hogs become infected, death losses are generally low.

Crop Roundup

FROSTS END GROWTH OF CROPS

Cold weather and killing frosts early in the week ending October 11 have ended growth of all but the hardy plants, according to the Pennsylvania Crop Reporting Service. At least one killing frost has hit most areas of the Commonwealth. Rainfall beginning Thursday and continuing intermittently during the weekend stopped most field work for the week but continued to improve subsoil moisture levels. Major farm activities for the period were cutting silage corn, seeding wheat and harvesting apples, grapes and potatoes.

SMALL GRAINS

Cutting of corn for silage is rapidly nearing completion. Most of the corn for grain was mature when the frosts occurred Picking is progressing in the southern and southeastern counties. Planting of fall grains and cover crops continues at a rapid pace. Planting of barley is nearly complete while active wheat seeding continues in the southeast. Volume combining of buckwheat continues in the west as soybeans ripen in the southeast.

HAY AND PASTURES

Very little hay was made during the week because of poor curing condition; however, large amounts were cut for green chop. Pasture condition remains extremely good. New alfalfa seedings have the best start in several years.

PA. SEEDLEAF TOBACCO

Production of Pennsylvania Seedleaf tobacco is forecast at 47 2 million pounds, unchanged from the September 1 estimate. The current production estimate is 3 percent larger than the 1964 crop but 13 percent less than the 1959-63 average. The crop is expected to yield an average of 1,750 pounds per acre, 50 pounds greater than last year but 50 pounds below the 5-year average. However, by excluding the 1962 and 1963 crops when high yielding varieties were grown, the crop is the highest yielding on record.

Volume cutting of the heavy crop began in mid-August and continued at a rapid pace through the second week of September. Weather was generally favorable for cutting and harvest was virtually complete by October 1. The early-cut tobacco is curing very nicely and color and quality are good. However, an extended period of high temperatures and humidity the week of September 20 was detrimental to curing of the later crop. As a result, some shed burn is anticipated. Weather since that period has generally been favorable for curing. No frost damage was evident this year and insect and disease damage was very light

Two Area Guernseys, Summarized Sires

Two registered Guernsey bulls in this area have recently been named Summarized Sires, according to the American Guernsey Cattle Club.

In Lancaster, Wyno Saint's Hugo, owned by Atlantic Breeders Cooperative, attained this distinction by having ten tested daughter with official production records. Their average production is 11,422 pounds of milk and 553 pounds of fat, when converted to a twice-daily milking, 305-day, mature equivalent basis. Eight of Hugo's daughters are classified with an average rating of 83.4 percent.

Mulhocaway Butterfat Hustler, owned by Rutter Brothers of York, was also named a Summarized Sire. He has ten daughters with official production records averaging 9,883 pounds of milk and 549 pounds of fat on a 305-day, mature equivalent basis. Hustler has had eight of his registered daughters classified with an average of 84.8 percent.

1200 Youths In Consv. Work During Summer

More than 1,200 youths made contributions to soil and water conservation activities in their communities this summer under the Economic Opportunity Act, according to Secretary of Agriculture Orville L. Freeman. They were employed in work-training and work-study projects sponsored by local groups with technical assistance from the U.S. Department of Agriculture.

The projects were planned sponsored, and operated by state soil and water conservation commissions and local soil and water conservation districts, and the jobs were provided under terms of the Economic Opportunity Act program The youths worked under the technical direction of USDA soil and water conservation specialists

Purpose of the program was to give youths opportunity to gain work experience and training to increase their employability or to earn money to resume their education

In the work training program, 894 boys and 295 girls

Agway hybrids make a practice of topping 100 bu. and 20 ton goals

Agway

Agway Offers Over 20 Varieties To Meet Your Specific Need

Two things an Agway Hybrid Corn Variety, plus the Agway Complete Crop Program for Corn . can put you over the 100 bushel and 20 ton goals It's a matter of record now.

The Agway 100-20 Corn Club was initiated in 1961. Its purpose was to test the possibility, right on the farm, of reaching and exceeding the profitable corn production goals of 100 bushels of grain and 20 tons of silage per acre, with a specific corn growing program

The tests proved that these high goals can be reached with the right crop management Four years of Agway 100-20 Corn Club averages

23 9 tons of silage/acre
10,033 lbs of TDN/acre
110 1 bushels of grain/acre

Agway 100-20 Corn Club . . .

FOUR YEAR RECORD

(based on actual field records of all participating farmers)

	1961	1962	1963	1964
SILAGE				
Fields	82	111	210	103
Ave Weight (tons per acre)	24 1	24 8	24 1	22 3
TDN (lbs per acre)	10.221	10.231	9,999	9,739
GRAIN				
Fields	93	62	51	59
Bu Acre	108	117	109.2	106 9

AND THESE AVERAGES WERE MADE IN DROUGHT YEARS!

How did these corn growers make such high yields under such severe conditions? All participating farmers used the right Agway Hybrid and they followed the practices recommended in the Agway Complete Crop Program for Corn

Meat Imports Below Level Demanding Pres. Quota Imposition

The revised estimate of meat imports into the United states during 1965 places the total at 630 million pounds, according to Sec. of Agriculture Freeman. This quantity would not require presidential action to invoke meat import quotas during 1964.

Under legislation enacted in August 1964, if yearly imports of certain meats — primarily beef and veal — are estimated to equal or exceed 110 percent of an adjusted base quota, the president is required to invoke a quota on meat imports The adjusted quota for 1965 is 8487 million pounds The level of estimated imports which would trigger its imposition is 110 percent of the adjusted base quota, or 933 6 million pounds.

Secretary Freeman said the estimate of fresh, chilled or frozen cattle meat and meat of goats and sheep, other than lamb, which will be imported is based on detailed trade surveys and other information. He pointed out that the expected volume of meat imports is 110 million pounds below the 1964 level of about 740 million pounds.

Pursuant to the law, the department will make its determination of the adjusted quota base and estimate of meat imports for 1966, and advise the president before Jan 1, 1966, Freeman said.

4-H Club News

P.M. 4-H'ERS ENTERTAIN
by Pat Eshleman, reporter

The Home Economics groups of the Penn Manor 4-H Club entertained their parents, leaders, and sponsors recently

The sewing club members put on a skit called "The Carpenter's Daughter." The cast included Anne Smith, Linda Porter, Connie Stehman, Peggy Eshleman, Patsy Eshleman, Betty Barley, and Lucy Herr

Instrumentalists were Linda Porter, Lucy Herr, Becky Harnish, Peggy Eshleman and Patty Eshleman. Betty Jane and Nancy Barley sang several duets.

Best of Show awards were presented to Kimberly and Kristin Winters for 1st year sewing; Patty Eshleman and Linda Lou Smith for 2nd year sewing; Ellyce Jean Engle and Anne Marie Smith for 3rd year sewing; Linda Porter and Connie Stehman for 4th year sewing.

BOOTS & SADDLES CLUB MEETS

by Darlene Neff, reporter

The regular monthly meeting of the 4-H Boots & Saddles Horse and Pony Club was held on October 8 at the home of Ronald Kreider, Manheim R1.

Light bulb money was collected A gymkhana was planned for October 24 at Pete Sheffer's, Columbia R1, at 1 30 p m.

One committee was picked to find a location for a trail-ride, and another for the location of the Christmas Party After the meeting, a doggie roast was held

The time and place for the next meeting will be announced later.

USDA Issues Statement On Stockyard Rules

The U. S. Department of Agriculture has proposed an interpretative statement on regulations and practices of stockyard owners and market agencies under the Packers and Stockyards Act.

The statement sets forth the factors which Consumer and Marketing Service would consider in determining the reasonableness of proposed changes in market regulations, practices, or facilities.

It states that C&MS encourages new regulations, operating practices, and facilities which will make livestock marketing more efficient and competitive, and points out that P&S regulations provide for industry self-regulation—such as the application of by-laws, rules, regulations, or requirements which do not conflict with the P & S Act and its regulations.

According to the statement, the P&S Act does not prohibit changes in the method of trading at a market. A terminal market, for example, may be converted to a public auction market that could be operated by the stockyard owner, or by the owner in association with some or all of the market agencies which were in business at the terminal market.

Livestock markets do not require federal certification as public utilities to go into business, nor do they need federal approval to discontinue operating.

When a stockyard owner changes his method of operation, services or facilities, reasonable public notice must be given as far in advance as possible.

Wean at 3 weeks
-- get 50 lb. pigs
at 9 with

WAYNE
TAIL CURLER
ROCKETS

Yes, that's what the new Wayne Tail Curler Rockets did for typical early weaned pigs at the Wayne Research Center.

Pigs go for the tasty new Tail Curler Rockets. (3 to 1 over a creep feed formerly considered very palatable.) They get top nutrition from choice ingredients, carefully balanced and fortified to meet the critical needs of baby pigs.

Tail Curler Rockets contain Complex 65, Wayne's Aureomycin, Sulmet and Penicillin combination that gives the difference you can see!

If you don't care to early wean, Tail Curler Rockets will pay off as a pre-starter.

Remember every pound of creep ration eaten means a pound heavier pig at weaning, and a head start that lasts all the way to market.

ASK US FOR COMPLETE DETAILS ON FEEDING.

• NEPPCO

(Continued from Page 1)

NEPPCO Exposition on Tuesday. The Hess entry of medium-sized white eggs scored 98.5 points out of a possible 100 to defeat entries from 62 farms and egg packing organizations in Class I competition.

Six other Hess entries won blue ribbons in the same event with scores of 96 points or more.

Other blue ribbon winners from this area were: Musser Poultry Farm, Mount Joy; Producers Cooperative Exchange, Coatesville; Carl L. Greenly, Ephrata; Weaver's Quality Eggs, New Holland. The only ribbon awarded in the brown egg division went to E. Roy Trout & Son, Paradise.

PENNSYLVANIA MISS WINS NEPPCO POULTRY PRINCESS title. Connie Hoffman of Catawissa was selected from a field of seventeen lovely contestants to represent the poultry industry in the Northeast for 1965-66. Shown with Miss Hoffman are left to right, Phillip Alampi, N. J. Secretary of Agriculture and master of ceremonies for the princess pageant; Roxanne Marie Varano, 2nd runnerup; Miss Hoffman; Barbara Ann Clark, 1st runnerup; Harry P. Metz, president, NEPPCO. L. F. Photo

• Flock Size

(Continued from Page 1)

um sized operations averaging 9,900 birds returned a labor income of minus $746, and large operations averaging 22,000 birds provided a labor income of $6,922.

Labor income, the speaker explained, is the amount left to the farmer for his own labor and management

"With this record of low returns from the smaller businesses," Carncross said, "it is little wonder that many of these producers have gone out of business in recent years."

Carncross said that larger flocks enable poultrymen to obtain standard production with less labor time In the New Jersey study, flocks of 5,000 birds required 1 3 hours of labor-per-layer a year. The amount of labor time required to raise a layer on a farm of 9,000 birds,. on the other hand, was only 0 9 hours and this figure dropped to 0 7 on farms of 22,000 layers.

Since increases in flock size require increases in capital investment, Carncross urged poultrymen to undertake a program of educating local bank officers to the needs and possibilities of their business

"The day is here" the professor concluded, "when the successful family farm will have from 15,000 to 20,000 or more layers Some of these farms will be independently financed In an increasing number of cases the egg producer is likely to enter into some form of contract with egg processors, feed dealers or other interested concerns.

"Today's successful egg producer keeps on top of all changes to keep from being washed up tomorrow,' he concluded

Broiler Production Up 12 Percent Over 1964

Pennsylvania's broiler production was up again in September, making it the ninth consecutive month with increases over 1964 volume, according to the State Crop Reporting Service.

Broiler placements of 1,-397,000 and broiler-type egg settings of 6,398 000 during the month were higher by 16 percent and 21 percent respectively in September last year.

In the first nine months of this year, broiler chick placements totaled 34,329,000, up 12 percent over the comparable period of 1964 In the same period 53 912 000 broiler-type eggs were set an increase of 18 percent over last year

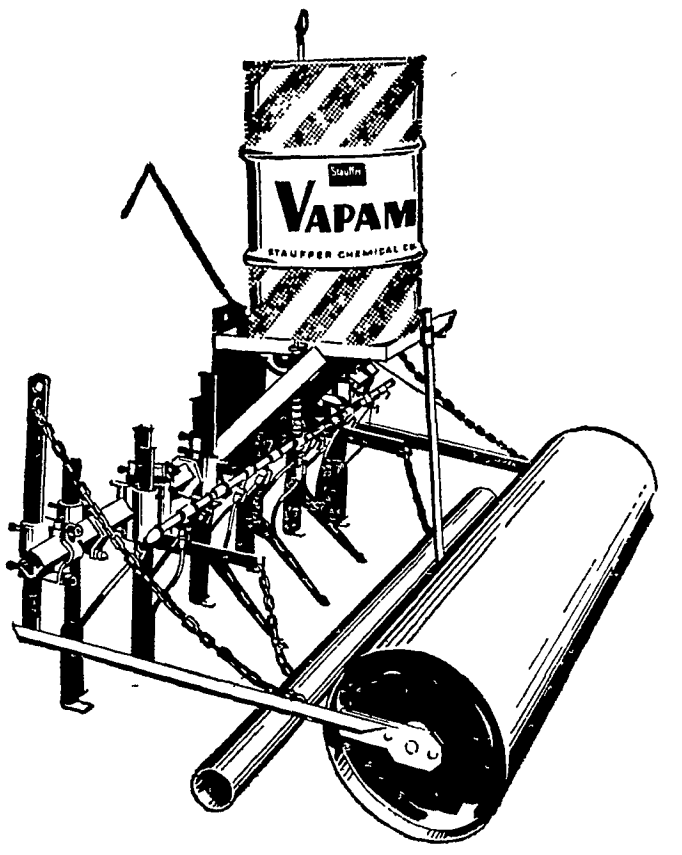
Attention Tobacco Farmers



For the best in seed bed fumigation— let us apply VAPAM® to your seedbed this fall!

Here is a combination — VAPAM with our application service — that gives you a clean seedbed accurately, safely and economically. The machine meters the proper amount of VAPAM into the prepared soil of your seedbed — smooths and firms the soil all in one easy operation All that remains for you to do is cover the ground with a tarp or water-seal in the VAPAM, and you are finished until planting time Fumigation time is therefore reduced to minutes — instead of hours.

*VAPAM controls weeds and weed seeds, including grasses and broadleaf weeds, as well as soilborne pests that attack ornamental, food and fiber crops, and tobacco. Call us and see how this toil-saving combination can benefit you

For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

VEAL FAVORITES

SPENCE

Now is the season for veal: veal roasts, veal chops and steaks, veal stews, and veal for stuffing Veal is so delicately flavored that it combines especially well with many different seasonings and may be used in truly exotic recipes, if you wish. Exotic as the finished dish may be, the basic cooking methods used are roasting and braising. Because veal is young beef it has very little fat and so broiling is not recommended. You can recognize good quality veal in the market because it is light pink, firm, and covered with a thin layer of white fat. In planning on the amount to buy allow 1/3 to ½ pound of bone-in veal and ¼ to 1/3 pound of boneless veal per serving. Remember, some people eat two servings, so buy plenty. Veal can be used in a variety of leftover recipes

CROWN VEAL ROAST WITH FRUIT 'N CHEESE STUFFING

- 1 veal breast, about 6 lbs.
- Salt and pepper
- 2 cups dry bread cubes
- 1 cup chopped red-skinned apples
- 1 cup grated sharp Cheddar cheese
- ¼ cup seedless raisins
- ½ stick (¼ cup) butter or margarine, melted
- ¼ cup orange juice
- ½ teaspoon ground cinnamon
- ½ teaspoon salt

Place veal breast bone side up. Cut breastbone at 1-inch intervals 1½ inches deep. Turn meat over and rub with salt and pepper. Stand roast on thick edge. Bend to form circle with bones on outside. Tie or skewer ends of meat together. Place roast on rack in roasting pan. Combine remaining ingredients and stuff into meat cavity. Cover bones with strips of bacon to prevent drying of meat. Place in shallow pan. Add 1 cup water Cover roast loosely with foil and cook in a slow oven (325 degrees) about 10 minutes per pound. For last hour of cooking, remove foil and bacon strips, and insert meat thermometer into center of stuffing. Cook until stuffing reaches an internal temperature of 165 degrees and veal is brown and tender. 6 to 8 servings.

* * * *

VEAL CURRY & NOODLES

- ¾ cup regular all-purpose flour
- 1 teaspoon salt
- ⅛ teaspoon pepper
- 1 pound veal, cut in 1-inch cubes
- 3 tablespoons butter
- 2 tablespoons chopped onion
- 1 cup water
- 1½ teaspoons curry powder
- 2 cups milk
- 1 package (6 ounces) medium noodles
- Shredded Cheddar cheese
- Freshly grated Parmesan cheese
- Candied ginger, chopped
- Coconut, plain or toasted
- Blanched almonds, slivered

Combine flour, salt and pepper; coat meat with this mixture. Set remaining flour aside. In 10-inch skillet melt butter. Add meat and onion; cook until browned. Add water; cover and simmer 30 minutes. Remove meat from skillet with a slotted spoon. Add curry powder and 3 tablespoons of the reserved flour mixture; mix well Gradually stir in milk. Cook, stirring constantly, until sauce is smooth and thick. Return meat to sauce and heat thoroughly. Meanwhile, cook noodles in boiling salted water until tender, according to package directions. Rinse and drain. Put noodles on a large platter. Curry sauce may be poured over noodles or served in a chafing dish. Serve with Cheddar Cheese, Parmesan cheese, candied ginger, coconut and almonds. Makes 6 servings.

* * * *

VEAL LORRAINE

- 4 thin veal steaks
- ¼ cup flour
- 3 slices bacon, diced
- ½ cup chopped onion
- 1 teaspoon dried parsley flakes
- 2½ cups water
- 1 can (10 ounces) condensed consomme
- 1 can (4 ounces) mushroom stems and pieces
- 1 tablespoon chopped green olives
- ½ teaspoon salt
- ⅛ teaspoon pepper
- 8 ounces elbow macaroni
- 1 teaspoon lemon juice

Heat a 1½ quart serving dish. Coat veal with flour and flatten with meat mallet. In large skillet partially cook bacon, then brown veal on both sides Remove veal. Stir in onion and parsley, and cook 5 minutes, or until tender. Stir in consomme, water, mushrooms, olives, salt and pepper, bring to boil. Stir in macaroni, then return meat to pan Cover and let simmer about 20 minutes, or until macaroni is tender, stirring occasionally Stir in lemon juice, turn into serving dish and serve immediately.

* * * *

VEAL LASAGNA

- 5 cups tomatoes
- ¾ cup tomato paste (6-oz. can)
- 1 teaspoon crumbled oregano

For The Farm Wife

(Continued from Page 10)

teaspoons salt
teaspoon pepper
cup mushrooms, drained (4-oz. can)
1 pound cooked cubed veal
8 ounces lasagna
1 tablespoon cooking oil
1 pound Mozzarella cheese, sliced
½ cup grated Parmesan cheese

To prepare tomato sauce, combine tomatoes, tomato paste, oregano, salt and pepper in large skillet or saucepan Simmer mixture until it is of medium consistency, about 30 minutes Add mushrooms and veal to tomato sauce Cook lasagna in boiling salted water until tender, about 15 minutes. Drain.

Grease 9 x 13-inch baking pan with cooking oil. Put a thin layer of tomato sauce in bottom of pan Top with a layer of lasagna Add a layer of Mozzarella cheese slices Sprinkle with Parmesan cheese Repeat layers until all ingredients are used, beginning with tomato sauce and ending with Parmesan cheese

Bake in moderate oven (375 degrees) 35 to 40 minutes Makes 4 to 6 servings

Livestock Exposition

(Continued from Page 1)

ior division; 85 feeder steers; 81 open class steers, 108 junior (4-H and FFA) steers, and 21 carcass steers.

Sheep will include 953 in breeding stock, 25 junior breeding sheep; 164 market lambs, and 80 carcass wethers

Breeding swine total 513; market barrows, 606, and carcass barrows, 120

Horses will include 78 appaloosas, a breed that will be in the show for the first time Arabian horses, back for their second appearance, will total 136.

TEEN-AGE FATALITIES

The leading cause of accidental death among teenagers is the motor vehicle accident, the Pennsylvania Medical Society reports At the age of 18 and 19, two thirds of all the boys who die accidentally, and four-fifths of all girls who die from accident, are motor vehicle fatalities The teen-age driver needs to learn to discipline his natural daring

Some Reminders For Babysitters

Babysitting is a real profession, whether the sitter is a teenager or an adult It's a job that should be taken seriously Being responsible for young children imposes rigid rules

There's more to babysitting than just being there Sitting in an easy chair for a few hours doesn't qualify anyone for responsible child care

Resourcefulness, common sense, and cleanliness are among the essential qualities required for a babysitter It's not enough for the sitter to make sure the child washes his hands before a meal, she must be just as faithful about scrubbing her own hands with warm soapsuds before preparing and serving food She must set an example of good grooming as well as good manners for her young charge She must never come to work in curlers or spend time on the job fixing her hair

Wearing clean, safe, and comfortable clothing increases the sitter's efficiency Handwashing is important before touching or picking up a baby and before touching the baby's bottle

If bathtime is included in the babysitter's schedule, she should allow for a little water-play in the tub This helps to gain the child's cooperation.

The sitter who hopes to be invited back again always puts the house in order before she leaves. This includes washing all dishes and cooking utensils she used, then drying or stacking in the drain rack

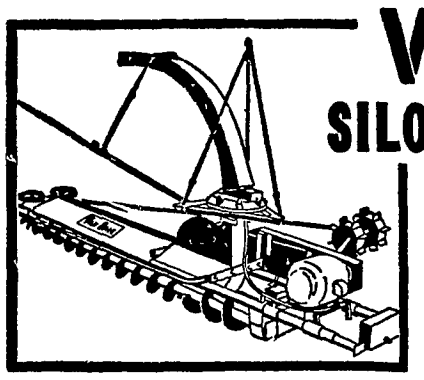
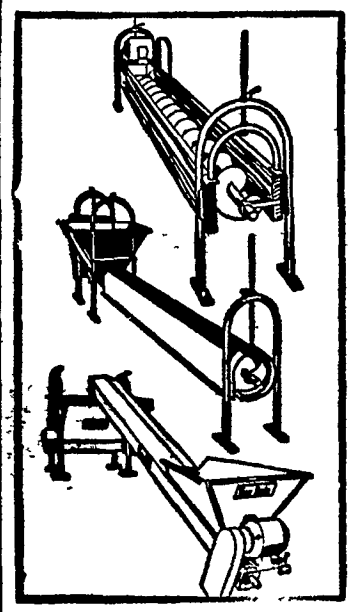
Complete automatic feeding for DAIRY COWS and CATTLE!



VanDale SILO UNLOADERS

Double augers deliver more silage per minute even when silage is deeply frozen . . . and at a lower operating cost. Patented V-paddle impellers *throw* . . . not blow . . . silage down chute. Adjustable drive hubs give positive traction in all types of silage.
Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder
With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 16', high capacity 8" auger. Additional auger sections are in 16' units and are easily coupled.

Feed-R-Flo Bunk Feeder
The new, all-metal complete feeder. High capacity 8" auger rotates within tube. Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough
An important link in automatic feeding. Positioned below silo chute, the VanDale conveyer trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 16', 8" auger. Additional 16' auger sections may be added.

See us for complete automatic feeding equipment

Farm Women No. 1 Reelect Mrs. Sangrey

Mrs. J. Clayton Sangrey was reelected president of Society of Farm Women No. 1 at the meeting held on Saturday afternoon at the home of Mrs. Martin Moore. Other officers reelected included Mrs. Roy Brubaker, vice president; Mrs Raymond Newcomer, corresponding secretary; Mrs. Amos Shenk, treasurer; Mrs. Brubaker, music director, assisted by Mrs. W. Dean Fyock, Mrs. P. F. Snyder, reporter. Mrs Graybill Holsinger was elected recording secretary.

Mrs. Sangrey was in charge of the meeting and Mrs. Joseph Russell led the devotions. Mrs. Charles Ackley, a new member, was admitted to the organization. The group will sew today at Lancaster General Hospital.

A contribution was made to the Needlework Guild and six of the members will assist at folding TB seals. Announcement was made of the Heart Haven fall luncheon at Hotel Douglass on Nov. 21, also the County Convention to be held in the Ephrata High School on Nov. 6. Cookies will be given to Child Development Center on Oct. 28.

The following members will visit the County Home on October 21: Mrs. Amos Shenk, Mrs. Franklin Weber, Mrs. B. G. Shaeffer and Mrs. Sangrey. Mrs. John Newcomer gave a report on the Symposium for Speech and Hearing problems, held last Saturday in Lancaster.

Mrs. Gerald Lestz was the guest speaker. Her subject was "Antiques Are Meant to Live With." She showed slides of charming old houses furnished with antiques being used at the present time.

Mrs Landis Myer, the county president, was a guest and Mrs. Fyock was cohostess.

The first news agency for the dissemination of news was established in Boston, Mass., about 1811.

● 1200 Youths . . .

(Continued from Page 5)

between 16 and 21 were enrolled in local Neighborhood Youth Corps in 23 States. The boys worked on survey crews, flood damage repairs and recreation projects, and as aides to professional personnel. The girls worked for the conservation districts as clerks and typists.

Four state soil and water conservation commissions sponsored statewide NYC projects and 17 soil and water conservation districts sponsored local projects. In all, 438 conservation districts participated in the program by providing useful work and training experience.

Most of the conserva districts expect to continue expand the work next s mer and, where possible, provide part-time work ing the school term.

INVENTED TELEPHON

Daniel Drawbaugh, a H risiburger, nearly repla Alexander Graham Bell as inventor of the telephone. did develop a telephone eit earlier or at the same t as Bell, but he failed to t out a patent, which Bell done in 1876. But the disp was serious enough to be ried to the Supreme Co where Bell's patent prio won out.

"Do you mean we can't have a chimney if we put in electric heat?"

"No, dear. I said we don't *need* a chimney with electric heat, because it's flameless. You don't need an escape route for smoke or fumes as you do with flame-type heating systems."

"We can have a fireplace, then, with a chimney if we want one?"

"Of course, dear, but more important, we'll have all the benefits of modern electric living . . . it's so clean, comfortable, convenient and space-saving. There are no flames, no soot, no fumes, no odors Best of all, electric heat is so economical."

Join the better than 10,000 PP&L-served families already enjoying clean, flameless electric home heating. See your builder or your Reddy Kilowatt Recommended Home Heating Dealer (listed in the Yellow Pages).

Poultry Industry In The Northeast Is Challenged

HARRISBURG, Pa. — A bold, imaginative program of industry improvement and expansion can put poultrymen from the Northeastern United States back in their former position at the head of the nation

That is what Kenneth Hood, assistant secretary and commodity division director of the American Farm Bureau Federation, told members of the Northeast Poultry Producers Council (NEPPCO) on Tuesday.

Delivering the keynote address at NEPPCO's 28th Exposition and Convention in the Farm Show Building, Hood challenged poultrymen from a 14-state area to believe completely in their product and their ability to provide better service to the world's biggest market

Using a series of eight charts Hood showed that the Northeast has declined steadily in the last decade from its position as No 1 poultry and egg producer for the nation

The Farm Bureau representative also urged farmers in the Northeast to resist with all their might government attempts to establish a quota control system for the poultry industry.

'A quota system based on recent history would freeze individual poultrymen and the whole Northeast into a rigid pattern that would permit neither change nor expansion.' Hood said "If you are going to grow, you must resist legislation which would nail you down where you are"

In summarizing the main points of his suggested program, Hood said, "Exploit your advantage of nearness to market to the fullest You can furnish services which outside competitors can't touch—such as store door delivery and fill-in orders with fast delivery.

'Develop the large and growing institutional markets in the area There may be opportunities to expand contract marketing with tight qualifications on quality, size, volume and time of delivery

Since the Northeast is a deficit area many egg buyers have procurement problems . . . which can possibly be alleviated by contracting with large individual producers, farmer cooperatives or proprietary concerns for what they want when they want it"

The agriculture administrator urged farmers to develop more effective ways of handling surplus eggs" noting that "too many eggs head for the big markets without a home There is too little coordination of shipments and information on what is being shipped he added

MODERN TRANSIT

Pennsylvania moved rapidly into the age of modern urban transit in the early 1900's The horseless carriage' created close contact between city and country but the urban community expanded most with the growth of the streetcar By 1901 there were over two thousand miles of trolley track in the state For the first time the working population could live at a distance from the commercial district, and thus residential and suburban areas grew in prominence

EGG PRODUCERS

All Systems Are Go For Better And Lower Cost Egg Production

ANNOUNCING An ADVANCED and IMPROVED Program for Feeding Layers

The Early Bird Optimum Performance Line

This program will —

1. Get them up there quicker.
2. Keep them up there longer.
3. Bring them down slower.

PLUS

- **Larger average egg size in the early stages of production.**
- **Better liveability through improved flock health.**
- ***Better overall shell quality.***

This program will match maximum performance with sensible minimum costs per dozen or per pound of eggs, at all levels of production for both cage and floor operations!

Here is just one of the many favorable comments we have received since the introduction of

Our OPTIMUM PERFORMANCE LINE

We want to congratulate you on the comprehensive and far-sighted feeding program for layers you launched October 4. It encompasses all the best thinking that we're aware of that sound research has provided. We wish you great sales success in the coming year.

Sincerely,

Signed by an official of a nationally known poultry organization.

For further information on the new Early Bird Optimum Performance Line, ask your Early Bird representative or call —
